Association for the Promotion of Organic Farming in Aveyron

Structure : APABA

Difficulté : facile

OUR MAIN OBJECTIVES

In the late 1980s, Apaba was founded primarily by consumers, along with a few producers, with the following main objectives:

- To raise awareness of organic farming and organic producers;
- To represent and advocate for organic producers;
- To bring together organic producers to gain leverage against larger commercial players.

Today, the increase in land area dedicated to organic farming and the re-territorialization of the Aveyron organic economy are driving the association to adapt in order to meet the needs of producers and respond to societal expectations. APABA is committed to upholding a rigorous approach to organic farming, guided by the ethics of sustainable development that respects both people and the environment.
