#citizen #collective #eco-friendly #exchange

Supporting those who live or wish to live in collective eco-communities: the oases.

Structure : Oasis Cooperative

Difficulté : facile

There are more than 1,200 Oasis projects in France. They are listed on a map shared by the Oasis Cooperative and Habitat Participatif France. This map is jointly managed by the two organizations under a CC-BY-SA open license.

Across France, citizen collectives are creating new ecological and community-oriented spaces known as eco-hamlets, participatory housing, collective farms, third places… We call them oases.

The Oasis Cooperative supports those who live or wish **to live** in these ecological and collective spaces, the oases.

It introduces **people to** the reality of the thousands of projects existing today in France, and offers the opportunity to stay there or settle in.

It supports those who want **to create** their own community.

Finally, the Oasis Cooperative creates connections between these communities so that they

become aware that they are part of a genuine network they can rely on. In this way, it fosters the emergence of a different way of life—a way of inhabiting the world that is more intense, simple, and joyful.
