TO PROMOTE TRADITIONAL CRAFTSMANSHIP AND THE PRINCIPLES OF PRACTICAL ECOLOGY, AND TO MAKE HEALTHY AND COMFORTABLE HOUSING ACCESSIBLE TO EVERYONE

Structure : ECO-HABILIS

Difficulté : facile

Ibos (65)

Occitanie

Eco-Habilis is an association based in the Hautes-Pyrénées whose mission is to promote traditional craftsmanship and the principles of practical ecology, and to make healthy and comfortable housing accessible to everyone.

We are a small team of passionate individuals committed to sharing eco-construction and practical ecology techniques so that everyone can acquire the skills and know-how needed for self-sufficiency and personal fulfillment.

We organize training sessions at our Nestier facility (kindly provided by the CCAS EDF) and will soon begin our "re-engagement weeks" as the ETRE School in Lourdes.

The goal of Eco-Habilis is to **pass on forgotten skills** that sometimes open a path toward building one's own home, but also toward a form of energy and food self-sufficiency that respects the environment and everyone's work.

We prioritize local, natural, low-emission materials and manual labor despite the efficiency of automation. We are convinced that with the right tools, anyone is capable of building their own home with all the features necessary for sustainable energy consumption without resorting to costly construction or purchases.

Eco-Habilis, a School for Ecological Transition in the Hautes-Pyrénées

In July 2022, Eco-Habilis was selected in the ETRE Schools project call for proposals in the Hautes-Pyrénées. Eco-Habilis is now an ETRE school.

[The ETRE Schools](#), through their charter, emerging structures, and the host site (Lahage), invite us to develop and bring to life our projects, our ambitions, and our values.

Creating an ETRE school allows us to expand our training program and attract a younger audience, particularly those in vulnerable situations, with the aim of becoming an integral part of the local community, alongside its residents.
