#culture #environment

The association works to promote local areas and their heritage, ranging from historic monuments and landscapes to intangible assets (such as sustainable development, etc.)

Structure : The Wall-Walker

Difficulté : facile

Clapiers (Hérault) Occitanie

Welcome to the world of Passe Muraille, where heritage comes to life, culture is shared, and knowledge is exchanged. We uncover the identity of your region through its history, culture, and landscapes, to share it with all audiences. **We are committed to building a sustainable, desirable, and inclusive future with you.**

Expertise for over 25 years

For over 25 years, Le Passe Muraille has been developing its expertise in heritage, culture, and the environment. Every day, we work to preserve built and natural heritage and promote it to all audiences. From strategy to implementation, Le Passe Muraille leads studies and restoration projects and designs interpretive tools.

Our Services

Cultural events: Le Passe Muraille supports you in the design and production of your artistic events (live performances, contemporary art, Land art, etc.). We develop custom events for you that address the specific needs of your region or site. We handle the preliminary study, artistic programming, scenography, technical implementation, and production support for the project. We also handle outreach and communication to offer a fresh perspective on your region and provide audiences with an unforgettable experience. Our team consists of artistic directors, set designers, technical directors, mediators, and communications professionals.

Tourism Strategy

Do you aspire to set a new course for tourism in your region? We are here to support you by developing concrete strategies and engaging stakeholders.

Visitor and Discovery Trails

Do you want to showcase a heritage site or route? We have the expertise needed to create an attractive, engaging, and site-sensitive tour that helps visitors understand the challenges of preserving it.

Consultation and Co-creation

Do you have an urban and/or regional project that requires the collaboration of residents and stakeholders? We design the communication strategy and facilitate the consultation process.

Landscape Design for Protected Areas

We are experts in designing unique projects that respect fragile or protected natural areas. We enhance the site while respecting its landscape and species.

Environmental Preservation

Our work aims to enhance and preserve the environment and the quality of our living environment. Heritage is a key factor in the identification, distinctiveness, and structuring of territories. Discovering and understanding heritage, understanding our heritage, and engaging with the diversity of heritage forms lead us to question our lifestyles and anticipate the consequences of our use of environmental resources in accordance with an ethic of responsibility.

Reducing our carbon footprint

Our ambitions in the areas of social innovation and sustainable development fully engage us in the major societal challenges of today and the years to come. Thus, our development is based on the principles of co-creation, the circular economy, sustainability, commitment to addressing

climate change, and the necessary adaptation of regions. We are currently pursuing ISO 14001 certification.
