#circuit #co-consumer #commitment

AMAP: a local partnership between a group of consumers and one or more local producers, based on a system of distributing "baskets" filled with farm-fresh produce.

Structure : Conscious Consumers 46

Difficulté : facile

Gourdon (Lot) Occitanie

We have established a **community-based partnership** between a **group of consumers** and **local producers.** The foundation of this partnership is a distribution system of “baskets” filled with farm-fresh produce.

It is also a **solidarity-based contract**, founded on the financial commitment of consumers, who pay in advance for all their purchases over a defined period. This system therefore operates on the principle of trust and mutual accountability between consumer and producer.

A CSA is:

* **for the farmer**, the maintenance of agricultural activity through a guaranteed income;

* **for the consumer**, fresh, seasonal, organic food produced from local or heirloom plant varieties or animal breeds;

* **For both partners**: a fair price.

We currently bring together **11 producers** who feed **about 100** families

Meat, bread, vegetables, milk & cheese, and fruit are distributed every week
