Working Together Locally for the Environment

Structure : National Union of CPIE (Permanent Centers for Environmental Education)

Difficulté : facile

In the face of ecological, social, and democratic emergencies, **CPIE-certified organizations** are pooling their 50 years of experience and expertise to **accelerate the resolution of environmental issues at the local level.**

To foster a genuine **collective effort in support of life**, each CPIE:

- Identifies an unresolved local environmental problem through monitoring and intuition;
- Gradually fosters a shared interest in resolving it with the relevant stakeholders;
- Develops a culture of listening to these stakeholders;
- Facilitates and supports engagement in the actions developed together to resolve the problem.

The CPIE network's work is grounded in shared values

- **A humanism** that views the future with responsibility and recognizes our interdependence with living heritage;
- **The founding principles of Popular Education**, notably empowerment, cooperation, solidarity, and social justice;
- **Respect for and protection** of all components of life;
- **A scientific**, open, and constantly evolving **approach** to advancing knowledge.
