#computer science

Community-run digital recycling center in Montpellier

Structure : Infolibre34

Difficulté : facile

Montpellier

Infolibre 34 is an association dedicated to maintaining local IT infrastructure (AMIP).

It is an association aimed at **individuals and organizations** concerned about their **digital footprint** and the impacts of the world's **digital transformation**.

It offers solutions to:

- Reducing the number of IT devices that are purchased, discarded, and manufactured...
- Taking control of our data and better managing our digital lives through open-source software
- Meet, discuss, and reflect on the digitalization of the world

Specifically, we offer solutions for those who find themselves in one of these situations:

- I have a computer or smartphone that isn't working properly, and I'd like to avoid

buying a new one
- I'd like to buy a used computer but I don't know anything about them
- I'd like to have support when I have a computer problem
- I don't want my entire digital life to be monitored and analyzed
- I'd prefer to use open-source systems and software
