Center for Recycling and Reuse Innovation

Structure : CERR - Zero Nine

Difficulté : facile

Foix

The association “Centre d’expérimentation de la récup’ et du réemploi” was founded on February 3, 2015. The association runs the Zero-neuf resource center; the store opened on April 16, 2016. The store is located in Les Bordes-sur-Arize in Ariège.

These two Ariège-based associations committed to **the fight against waste** are made up of staff and volunteers who collect, recycle, and sell secondhand items, and organize workshops to raise awareness about **waste reduction** using **community education** methods.

These activities are part of a **shared governance** model with sustainable jobs.

For the online shop project, we chose to partner up to offer you a selection **of rare** and unusual **items to browse online**, without having to leave your home :)

This collaboration has also allowed us to adapt a salaried position for someone with a disability.

To **learn more, make a donation,** or **become a volunteer**!
