Habiter Autrement

Castres Occitanie

The association UN AUTRE TOIT is based in Castres and promotes **eco-friendly living through community-led housing and green building**. Its goal is to raise awareness, inform, and support those who wish to build, renovate, or live differently.

To this end, the **association organizes and participates in events, meetings, and participatory construction projects** to foster the exchange of knowledge and the sharing of experiences. It connects project leaders with committed professionals to encourage collaborative and environmentally friendly practices.

UN AUTRE TOIT operates on a participatory model where each member contributes according to their skills and availability, thereby working to democratize more humane and sustainable housing.

The association brings together a diverse group of committed individuals united by a common vision: **to develop and promote solidarity-based and eco-friendly ways of living.**

Construction and architecture professionals, experts in eco-friendly design and renovation, as well as specialists in supporting shared housing projects.

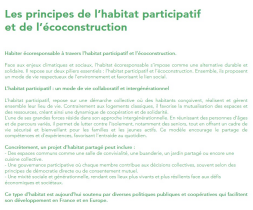

Individuals interested in participatory housing—whether they are future residents, curious or engaged citizens—eager to promote sustainable and collective alternatives.

Together, we pool our skills, share our knowledge, and support those who wish to live differently, with respect for people and the environment.
