

## BIODIV' OCCITANIE: THE ATLAS OF FLORA AND FAUNA

Structure : Union of Naturalist Associations (OC'nat)

Difficulté : facile

### Occitanie

The Union of Naturalist Associations of Occitanie ([OC'nat](#)) makes available the field observation data collected by its members and other naturalist organizations in Occitanie. Each new observation is added in real time to the species profiles you are viewing, with the aim of sharing and enriching knowledge about the biodiversity of our vast region.

This atlas presents observations made as part of various scientific protocols and by volunteers. It is neither an exhaustive inventory nor a complete distribution of species across the region.
