We are experts in composting. We help your waste return to the earth and regenerate the soil. By working with us, your facility chooses a food waste management method that cares for the soil.

The compost we produce from your facility's food waste is distributed to farmers, landscapers, and individuals in your region.

We offer tours of our **composting** facilities **or educational workshops for school groups—**a great activity for your eco-ambassadors' projects. They'll get to see firsthand, in a fun and hands-on way, how recycling their food waste helps nurture soil life.
