# Laboratory for Ecological Transition: Third Places + Participatory Housing

Structure : Oasis Fontmarie

*Difficulté : facile*

Castries Occitanie

Oasis Fontmarie brings together agricultural project leaders, eco-entrepreneurs, businesses, and individuals to address ecological, food, and social transitions.

Oasis Fontmarie is a nurturing third place that operates with social and environmental values by providing agricultural land to project leaders promoting agroecological practices. In an effort to raise awareness, the association also organizes group workshops and educational days for the general public.

L'Oasis Fontmarie is a place for experimentation, co-creation, and innovation dedicated to ecological, environmental, and personal transition. Our mission is to regenerate the Earth, nourish humanity, and support people through the transitions necessary to build a sustainable world. Open to all, Oasis Fontmarie is an association that supports the general public, entrepreneurs, and communities in their transitions.
