## OCEAN OBSERVATORY

Structure : Tara Ocean

Difficulté : facile

**The ocean sustains and preserves life. Essential to the balance of our planet, it remains largely misunderstood and threatened.**

The Tara Ocean Foundation is the first Foundation Recognized as a Public Utility (FRUP) dedicated to the ocean in France. Since 2003, it has been conducting scientific expeditions to study marine biodiversity, as well as to observe and anticipate the impacts of climate change and pollution.

**Thanks to its status as a Special Observer at the UN, it actively participates in decisions that are important for the Ocean.**

### Our 3 research areas

- [Marine Biodiversity & Climate](#)
- [Marine Biodiversity & Pollution](#)
- [Marine Biodiversity & Arctic](#)

### Share in the classroom

- [Our resources to support your educational projects](#)
- [Teacher training](#)

## Share our policy work

- [Policy initiatives in France](#)
- [International political actions](#)
- [Collective political actions](#)
- [Cooperation initiatives with the Global South](#)
