#former

Returning to the roots of viticulture to grow traditional vines that is, ungrafted (or ungrafted vines) in a way that is both environmentally friendly and respectful of biodiversity

Structure : The old branches

Difficulté : facile

Carnoules

Our Vision

Returning to the roots of viticulture to grow "old-fashioned" vines, that is, ungrafted (or ungrafted vines), within a framework that is both ecological and respectful of biodiversity, to produce authentic wines

Joining us means participating in our experimental research to combat phylloxera in an ecological way, and one day achieving "primitive" viticulture, out of respect for our ancestors and a duty to our descendants.

Our goal is to restore century-old vines, in complete harmony with their biosphere and biotope.
