DISCOVERING AND PROTECTING BIODIVERSITY

Structure : SPEC

Difficulté : facile

Neoules

The **S'PECE** Association—*Raising Awareness of Environmental Protection and Species Conservation* - was founded with the aim of contributing to environmental protection and raising awareness regarding biodiversity.

To this end, we work daily to conduct environmental assessments, inventories, and monitoring of wildlife, and offer a variety of educational and awareness programs for people of all ages

Our missions:

- Nature interpretation
- Biodiversity inventories and monitoring
- Training and support

Our initiatives in the region:

- Nature Workshops: Educational activities for students from preschool through high school and visitor centers
- Higher education: Training for the GMNF vocational baccalaureate, GPS BTS, and bachelor's degrees
- Nature discovery: Activities for all ages during events, conferences, field trips, work

camps...

- Nature monitoring: Inventories of fauna and flora, and population monitoring
- Wildlife rescue: Participation in the protection of local wildlife and "SOS Serpents 83"
- Support for stakeholders: Exchanging ideas and assisting professionals and individuals with their activities and on-site work
