National Directory of AMAPs: Supporting small-scale organic farming and the sale of produce baskets

Structure : CSFA

Difficulté : facile

Occitanie

AMAPs (Associations for the Preservation of Small-Scale Farming) are solidarity-based partnerships between one or more farmers and a group of citizens

They exist throughout France

- Concrete support for farmers, to promote the preservation and development of **SMALL-SCALE, ECOLOGICAL,** and **PROFITABLE** agriculture for farmers
- Direct and contract-based sales: A system of **DIRECT** and C**ONTRACT-BASED SALES**, without intermediaries—and therefore without markups—between farmers and AMAP members
- good products : A way for consumers to get **GOOD PRODUCTS** : fresh, local, and high-quality, at fair prices

In this partnership, everyone commits to:

- Farmers commit to regularly delivering healthy, fresh, and local products grown on their farms.
- Citizens (known as “Amapians”) commit to paying in advance for a certain number of baskets, based on a subscription model.

Through regularly delivered baskets, this system allows:

- farmers to be fairly and equitably compensated, and to have financial visibility thanks to the predictability of sales.
- for AMAP members to purchase quality products at a fair price, while being informed about their origin and how they were produced.
- for everyone to meet, exchange ideas, and share knowledge and practices, as well as enjoy shared, convivial moments.
