Toward an inclusive energy transition

Structure : GEFOSAT

Difficulté : facile

Montpellier Occitanie

Our primary mission: To support

Our various activities all work toward the same goal: supporting tenants, property owners, or any other public or private project owner in their efforts to save energy, carry out high-performance renovations, and adopt new models.

Through the Rénov'Occitanie help desk, we inform and advise project leaders. We also help social workers support their clients facing energy poverty.

Our on-the-ground knowledge reinforces our commitment to supporting public policies—for example, regarding measures to combat energy poverty—and our training activities.
