BUYING GROUPS IN PRIORITY NEIGHBORHOODS

Structure : Bulk Goods and Kitchens

Difficulté : facile

Montpellier

Occitanie

The current crises are putting a great many people and families in a vulnerable position as they lose their jobs or see their incomes decline, and suffer from social isolation amid a likely long-term context of health, environmental, and economic risks

The Vrac & Cocinas association supports the development of **community-based, solidarity-driven buying groups for quality products** (organic, ethically sourced, local) in neighborhoods prioritized by urban policy.

Its mission is to enable **residents of these neighborhoods** with limited incomes to **access food that is carefully chosen and not dictated to them**, thanks to the sale of products at **cost price and in bulk!**

VALUES:

- Access to healthy, dignified, and sustainable food
- Solidarity with producers
- Encouraging health promotion: by providing the opportunity to consume healthy products through a positive approach to dietary diversification that takes into account the determinants of health.

Enabling members to adopt an eco-friendly approach: by purchasing bulk products sourced from short and local supply chains
