Using eco-friendly materials in housing

Structure : DIY Resources

Difficulté : facile

Brico-Ressources.fr is a **blog** offering **practical and relevant advice** on **eco-friendly** construction and renovation projects.

This platform was created by **the** "Nature & Développement" **network of stores specializing in eco-friendly materials**

Managed by **a team of experts** in their respective fields, this blog aims to be as objective as possible
in offering you topics related to:

- **thermal and acoustic comfort** in your home
- choosing **healthy and eco-friendly materials** for your renovation projects
- **renovation tips** to improve your home's energy efficiency
- **regulations** and financial **assistance** applicable to your needs
- **meeting with** industry **professionals** to help you make informed decisions

In our stores**,** you'll find **all sustainable solutions, from structural work** (wood construction, concrete-free masonry, exterior joinery, etc.) as well as in **finishing work**, for **interior design** (kitchens, staircases, doors, partitions) or **decoration** (plasters, paint, floor and wall coverings, siding, etc.). To improve your **thermal comfort** (summer, winter) and acoustic **comfort**, the network's experts offer a range of bio-based insulation materials and corrective coatings, combined with all the necessary waterproofing and ventilation products.

The network's stores are also here to assist you with your **energy-saving** needs (lighting, heating, hot water, renewable energy) and water management (recovery, storage). You'll also find all the materials you need for your **outdoor projects**, whether for a patio, a fence, or their maintenance
