SOLAR ENERGY TRAINING AND PERSONALIZED SUPPORT

Structure : Ines Platform

Educational Innovations to Support the Energy Transition

To meet the demands of the solar industry and ensure that its training programs align with the latest advances in research and development, INES Formation & Evaluation has, since 2020, equipped itself with a new 350-square-meter technical and educational facility and 1,900 square meters of demonstration space. New innovative features, particularly those designed to enhance hands-on practice, contribute to the training center's growing appeal.

Customized training programs tailored to your needs, offering personalized support that combines technical facilities and digital tools.

7 themes:

- Building Envelope,
- Ventilation,
- Lighting,
- Carpentry,
- Heating,
- Solar thermal
- Solar photovoltaic

Nearly 50 training courses available

The training center offers:

- short professional training courses (in-person, online, or blended)
- long-term training programs
- certification or degree programs
- customized training for businesses and local governments to meet specific needs.
