Driving digital transformation for businesses based in Occitanie

Structure : Digital 113

Occitanie

Digital 113, the collective driving the digital sector in Occitanie beyond borders

Digital 113 brings together, engages, and supports stakeholders in the regional digital ecosystem.

Our values

- **Ethics:** for a digital sector that respects people and the environment
- **Sharing:** for a collective dynamic based on cooperation
- **Commitment:** to actively support businesses and contribute to the region's development

Our ambition: to promote the region's businesses, talent, and initiatives by facilitating collaboration and unlocking potential to bring projects to fruition.

.

Our services:

- **The concept of OTM** (Outsourced Training Management) with Digital 113
  : You focus on your core business—teaching and skills development.
  Digital 113 handles administration and regulatory compliance.
  A precise and structured framework ensures legal certainty and training quality.
  Every step is supported, so you can focus on what matters most: the participants' learning and experience
- Digital 113's **Digital Academy** offers short, realistic, and immediately applicable training formats designed to meet the specific needs of small and micro-enterprises
  . **The European NIS 2 Directive** aims to strengthen cybersecurity for critical businesses and organizations. It imposes requirements regarding risk management, information system protection, and digital resilience.
  Digital 113 supports digital companies in understanding the directive, identifying their obligations, and implementing the necessary measures for compliance, while strengthening their cybersecurity and digital resilience.
