BIOCLIMATIC FARM BUILDING

Structure : The Farm of Possibilities

LA FERME DES
POSSIBLES

Stains

Île-de-France

Located at the heart of La Ferme des Possibles and home to our headquarters, Résilience is an 1,882-square-meter building constructed using bioclimatic design principles with bio- and geosourced materials and reused materials.

A multiple award-winner, it boasts numerous resilient features and an exemplary carbon footprint.

It is a remarkable architectural and economic model that we are eager to share with you.
