CITIZEN INITIATIVES TO PROTECT BIODIVERSITY

Structure : TOMORROW IS HERE NOW

Gateway to the
Golden Stones

Auvergne-Rhône-
Alpes

For us, sustainable development means...striving to harmoniously balance economic, social, and environmental considerations.

Our area of focus is the **Beaujolais des Pierres Dorées** region **and its surroundings**

The association Demain c'est Ici et Maintenant aims to bring together the networks and initiatives of all organizations (businesses, associations, etc.) and citizens who share these values, creating a collective force to support this momentum in the region.

OUR ACTIONS FOR BIODIVERSITY

- Installation of birdhouses
- 2 bat house building workshops

- Our association is particularly committed to raising awareness and protecting swallows and swifts
- Nature cleanup with children from the school in Theizé
- Conference on “The Secret Life of the Soil”
- 1st symposium on education and sustainable development at A. Paulini Middle School in Anse.
