#waste

Building social connections and taking action through environmental protection and the fight against pollution

Structure : THE REASONED LOBSTERS

Pleslin-Trigavou | Brittany

“Les Homards Raisonnés” is a nonprofit organization based in Pleslin-Trigavou (Côtes-d’Armor) that operates throughout the Emerald Coast

Its mission is to foster social connections and take action through environmental protection, the fight against pollution, and any other means likely to contribute to the achievement of its mission.

We will carry out our work through the following initiatives:

1. The first is raising awareness, providing training, and conducting surveys of beach debris (e.g., Operation Cormorance https://www.operation-cormorance.com/ or one-off cleanups).

2. The second involves community gardens (located in Dinard, La Richardais, Plouër-Sur-Rance, Saint-Samson-Sur-Rance, Pleslin-Trigavou, and we are seeking additional sites).

3. The third initiative involves the reuse of industrial waste (wood shavings, natural slate, pallets, cardboard, potting soil, manure, etc.).
