#aquatic

Remediation of aquatic environments

Structure : DIVING FOR THE FUTURE

Auvergne-Rhône-Alpes

DIVING FOR FUTURE is a nonprofit organization. This organization was founded to defend, preserve, and protect the aquatic environment. All members are volunteers

CONCRETE ACTION FOR FUTURE GENERATIONS

Our missions:

- **- raising awareness about the critical state of our rivers, streams, seas, and**

oceans.

- **- Engaging in local volunteer efforts to clean up aquatic environments**
- **- Raising awareness about the silent pollution of the aquatic world**

Our association, Diving for Future, brings together divers and non-divers around a common goal of cleaning up aquatic environments.

Now in its fifth year, the association has already removed over 67 tons (weighed) of waste from the region’s rivers. This impressive achievement highlights the importance of pragmatic environmentalism, rooted in collective action and civic engagement.
