Network of Organizations Active in Environmental Education

Structure : IDée Network

Brussels and Wallonia

The IDée Network

The non-profit organization Réseau IDée has been in existence since 1989. As a network of associations active in Environmental Education (EE) in Wallonia and Brussels, it currently has 148 member associations. It is recognized in the field of continuing education.

The IDée Network provides teachers, facilitators, trainers, eco-advisors, parents, citizens, and others with clear, centralized information on EEE: existing educational tools, environmental education organizations active in Wallonia and Brussels, their activities (workshops, training sessions, internships, field trips, etc.), educational approaches, and more.

To achieve this, the IDée Network provides the public with two resource centers, offers personalized support and advice, and produces and distributes environmental education resources via the website www.reseau-idee.be, the magazine Symbioses, and various newsletters.
