Environmental Education and Sustainable Development Initiatives

Structure : Asterae

Axat | Occitanie

Our association, located in the Upper Aude Valley, is dedicated to environmental education and sustainable development—primarily through workshops and training programs—as well as supporting projects that benefit both the environment and people.

OUR INITIATIVES

Are you a local government, a school, a recreation center, or a business?

I offer a range of environmental education activities tailored to different audiences: children, youth, adults, people with disabilities, and seniors.

These activities align with the National Education curriculum for schools and the educational program for recreation centers.

DO-IT-YOURSELF WORKSHOP

I offer one-hour workshops for 12 participants to learn how to:

Plant propagation (e.g., cuttings, sowing seeds…)	Creating a living wall
Natural cosmetics	Tawashis, zero-waste sponges
Non-toxic household products	Worm composters
Insect houses	Edible mushroom cultivation
Jars for food preservation	Reusable cloth bags or produce bags
Sustainable food wraps	Plant-based dyes

GREENING OUR LIVING SPACES

My goal is to enrich urban and rural spaces by creating green areas, particularly by involving local communities through participatory projects.

Benefits:

- **Environmental:** protection of biodiversity and pollination, improved soil and air quality, better water filtration and storage

- **Economic:** food security, innovative urban planning, increased tourist appeal, economic stimulation, and job creation.
