

COLLECTION OF PROSTHETICS AND TRANSPORT VIA CARPOOL TO A RECYCLING FACILITY

Structure : Nav'Solidaire

Blainville-sur-Mer.

Normandy

We collect unused prosthetics through a network of 131 collection points in France and across Europe. Patients and healthcare professionals can donate their equipment by dropping it off at a collection point or mailing it to us. Our carpooling solution, "Bla-bla-legs," transports the prosthetics to our workshop in Normandy, thereby reducing our carbon footprint.

Thanks to the Atelier Nav'So and its volunteers, we recycle and reuse the prosthetics as part of a mission that promotes both solidarity and environmental sustainability. The workshop sorts, cleans, and prepares the equipment before shipping. On site, our orthopedic prosthetist partners ensure the equipment is properly used to fit patients.

We transport prosthetics to West Africa using "Bla-Bla-Boat" sailboats, thereby minimizing our environmental impact. Yacht owners transport this equipment during their voyages to Cape

Verde or the Caribbean, reducing CO2 emissions while supporting our humanitarian mission.
