

#decarbonization

SUPPORTING ORGANIZATIONS OF ALL KINDS IN THEIR "LOW-CARBON" STRATEGIES

Structure : Low-Carbon Artois

Béthune

Hauts-de-France

The association's mission is to drive the low-carbon transition in the Artois region, addressing both its ecological and energy dimensions while taking into account the mix of rural and urban areas that characterizes this region. It focuses on the availability of energy resources and climate change, while also addressing other planetary boundaries.

The association intends to use the following means of action:

- Contribute to driving the ecological and energy transition at the local level through programs created by and for citizens
- Organize the provision of low-carbon solutions for vulnerable populations (transportation, food, housing)
- Supporting people who are far from the job market in achieving sustainable employment
- Informing and raising awareness among stakeholders through on-the-ground initiatives

- Disseminate and explain scientific and regulatory information
- Support organizations of all kinds in their “low-carbon” strategies
- Promote the most appropriate solutions to relevant stakeholders
- Developing expertise on decarbonization challenges
- Guide, support, and train stakeholders in their transition efforts
