

THE GARD THIRD PLACES NETWORK BRINGS TOGETHER A GROUP OF "HYBRID" SPACES

Structure : GARD THIRD-PLACE NETWORK

Réseau des • tiers • lieux et lieux hybrides du ————— Gard

Occitanie

The network of third places and hybrid spaces in the Gard brings together a group of “hybrid” spaces located throughout the Gard department (30).

Beyond “[third places](#)” as they are typically defined, the network aims to bring together the region’s “non-traditional” spaces—organizations that, for the most part, fall outside institutional norms due to the **diversity** of their **missions** and the **varied audiences** they serve.

These are places that work within and for their local communities, alongside and for the residents, driven by a spirit of public interest and cooperation.

- Shared workshops,
- cultural hubs,
- maker spaces and other fablabs,
- coworking spaces,
- sociocultural spaces,
- alternative spaces for artistic creation and presentation... All of these initiatives contribute to the vitality of the region by focusing on innovation, sharing, and the participation of everyone.

OUR MISSIONS

- To facilitate the network, bring together stakeholders, and encourage the exchange of practices and knowledge through dedicated sessions focused on collective intelligence and through opportunities for social interaction.
- Support, guide, and equip project leaders
- Highlight the practices, venues, and teams driving these hybrid projects through various tools
- Promote the sharing of skills and resources among stakeholders
- Encourage collaboration
