

COMMUNITY-BASED AND NONPROFIT DRIVING SCHOOL

Structure : STEFI MOBILITY

Béziers

Occitanie

STEFI Mobilité consists of two social and community-oriented driving schools: one in Béziers and one in Bédarieux. STEFI Mobilité helps people in precarious situations with low incomes who face various barriers to mobility—including physical, psychological, linguistic, financial, and cognitive challenges—to obtain their Class B driver's license, an essential step in their journey toward social and professional integration.

STEFI Mobilité is about giving everyone the opportunity to get around, ensuring their participation in the region's economic life and their independence.

STEFI Mobilité offers:

- A teaching approach tailored to each learner's specific learning challenges.
- Affordable rates with flexible payment options.
- Unlimited theory classes until the exam is passed.
- Packages ranging from 20 to 40 hours of driving instruction (manual transmission).
- Themed group workshops: getting to know the vehicle, stress management, insurance systems, eco-mobility, and budget management.

- The option to practice at home alongside in-person lessons.

Our instructor holds the **ECSR** (Driving and Road Safety Instructor) professional certification and has 8 years of experience at a driving school. He uses the **FALC** (Easy to Read and Understand) method and adapts his materials and teaching style to non-native speakers.

He is trained in all so-called DYS disorders, ADD/ADHD, neurodevelopmental disorders (NDDs), and in working with the deaf and hard of hearing.
