#community #company

Support and training, in urban and rural areas, for projects aimed at advancing the ecological transition.

Structure : PERENNIAL CROPS

Marseille | Provence-Alpes-Côte d'Azur

Cultures permanentes was founded in Kenya in 2014 following a meeting between Cristiano Marinucci and Romain Criquet, two permaculture designers and educators who are passionate about nature and deeply concerned about the economic, social, and humanitarian consequences of natural resource depletion and global warming in Africa and Europe.

In Marseille and throughout the Greater Southeast Region of France, we offer the design and implementation of ecological projects, as well as permaculture training (we are a QUALIOPI-certified training organization).

We support and coordinate, in both urban and rural areas, regional development projects committed to the ecological transition.

For individuals, businesses, public entities, and organizations seeking to design their living and working spaces with a focus on well-being and sustainable development.

TRAINING PROGRAMS

Leading the Operational Implementation of a Strategic Roadmap

Edible Plants Throughout the Seasons: Botany and Chinese Dietetics
