Raise public awareness of biodiversity, ecology, and environmental issues

Structure : PHOTOLOGIST

La Bouilladisse

Provence-Alpes-Côte d'Azur

Raising public awareness of biodiversity, ecology, and environmental issues, as well as preserving the environment, will be achieved through:

- organizing nature outings,
- projects and outreach initiatives
- Another approach will be through nature photography, which will be promoted via introductory outings (hiding spots, hikes, collaboration with photographers) as well as through exhibitions
- Educational projects will be carried out in collaboration (with consultants) with schools (to raise awareness among the youngest students)
- Other long-term projects will be carried out, such as installing birdhouses in collaboration

with local authorities, monitoring wildlife populations, and greening our cities and cleaning up natural and urban areas
