The organization works with schools to raise environmental awareness

Structure : LISTEN TO YOUR PLANET

Sausset-les-Pins | Provence-Alpes-Côte d'Azur

The organization works with schools, **from preschool through high school**.

We conduct classroom activities as well as field trips.

If you'd like to organize a field trip, follow this link to visit the page dedicated to this topic.

Depending on your school's educational program, Écoute ta planète offers a variety of

activities.

The topics covered are varied, such as: animals, plants, the water cycle, pollution, renewable energy, exploring the port, the Étang de Berre, the coastline… and many others.

You can download our activity catalog by clicking on this link: ETAP activity catalog.

The association's involvement in:

The "Inf'eau mer" campaign.

To inform and raise awareness among a broad audience about protecting the sea and the environment through a fun and educational approach; to promote more environmentally friendly tourism; and to inform the public about the municipality's environmental initiatives,

The Life+ ENVOLL campaign.

This European project aimed at the sustainable protection of a group of seabird species facing significant conservation challenges: colonial larcolimicolous birds. The project consisted of two phases: a phase to restore habitats suitable for these birds' nesting, and a phase to raise awareness among users of these habitats. Écoute ta planète was involved in the awareness-raising phase.
