#decarbonize

Decarbonization and Biodiversity

Structure : DECARBONLAB

Centre-Val de Loire

Our 3 Key Themes

1. Decarbonization

- Creation of carbon sinks.
- Carbon sequestration.

2. Biodiversity

- A regenerative and innovative economy.
- Ecological restoration of ecosystems.
- Resource conservation (circular economy, bio-based materials, upcycling)

3. Ecological transition

- Awareness-raising and support for everyone, particularly small and micro-businesses
- Technical and operational solutions (eco-design, innovative models, and protocols).

Our 3 strategic areas of focus

Demonstrating that a rural region can lead its own transition program using its stakeholders, resources, and values.

Space, Coworking & Events: Coworking spaces, shared and private offices, room rentals, services, and a welcoming atmosphere

Innovation, R&D, and B2B Support: Eco-design center, Fab Lab, research and development, incubation and business incubator, professional training

Public Awareness & Education: Public outreach, Events and dialogue, Educational partnerships, Showroom
