#building #construction #insulation

A community of stakeholders committed to sustainable construction and development

Structure : ENVIROBAT OCCITANIE

Occitanie

The ENVIROBAT Occitanie Resource Center: A source of information and support for professionals in sustainable construction and development in Occitanie

The ENVIROBAT Occitanie network brings together a broad community of stakeholders committed to sustainable construction and urban planning. It promotes the sharing of experiences, innovation, and skill development to accelerate the sector’s ecological transition. Through this collective effort, it actively contributes to improving practices and disseminating low-carbon solutions in Occitanie.

Envirobat offers training courses: Adapting

your building to heat waves with simple and affordable
solutions Designing permeable, green, and shared
schoolyards for elementary, middle, and high schools Water management - Incorporating water-related issues into your development or building project in Occitanie
The sustainable
neighborhood approach Understanding and selecting bio-based materials for renovation and construction
Incorporating bio-based insulation into single-family homes or small multi-family buildings
