Construction Materials Reuse Center

Structure : MAS REEMPLOI

Montpellier Occitanie

Reuse Center for Construction Materials and Excavated Soil in Montpellier.

- Sale of materials to individuals and professionals
- Assessment: Resource, PEMD (Products, Equipment, Materials, and Waste) is a mandatory regulatory assessment in France that must be conducted prior to demolition or renovation
- Project Management Assistance (AMO)
- Collection and storage in a 5,000 m² facility
- Selective, preservation-oriented dismantling
- Awareness-raising and training for the general public and construction industry professionals

The reuse of materials is a contemporary challenge in a construction sector governed by numerous regulations regarding the use of materials.

Rigorous traceability ensures that reused materials meet the construction industry's high standards.

Traceability involves researching and analyzing materials. The information sought ranges from the material's date of manufacture, its method of application, the relevant European or French standards, its origin, and its nature to any transformations it has undergone.

Hours:
Tuesday through Friday: 10:00 a.m.–12:30 p.m., 2:00 p.m.–5:00 p.m.; Saturday: 10:00 a.m.–12:30 p.m., 2:00 p.m.–4:00 p.m.

Our accreditation as a professional integration enterprise (EI) allows us to provide social and professional support to help people who are distanced from the job market regain access to employment.
