Collection and reuse of materials, costumes, and sets. Theater Set Recycling Center

Structure : Art Stock

Since 2009, our association dedicated to the circular, social, and solidarity-based economy has been experimenting with processes for collecting and repurposing materials and stage sets. We have developed an innovative model for a cultural resource center with a significant environmental and social impact!

Since 2009, the association has collected more than 8,000 metric tons of materials and props from the cultural and events sectors with the goal of reusing and repurposing them. ArtStocK is a long-standing cultural resource center operating in Occitanie and Île-de-France. Today, ArtStocK is a key player in the circular economy with significant environmental and social impact.
